

Luna™ LED Flex Light

The Luna LED flex light provides a soft diffused light that will enhance any homes interior. It's inherent flexibility, low profile and ease of installation allow for use in almost any application, including counter tops, toe kicks, and baseboards. Luna is available for installation with 3M adhesive tape or mounting channel and rated for wet applications. The diffusion provides even, glare free illumination, while providing the necessary contrast needed to guide those with poor eye sight or cognitive impairments.

Luna LED Flex Light

Our job is to make your job easier.

elio/ITC's commitment to listening and responding to customer needs is what sets our team apart. Top to bottom, we're known for exceeding customer expectations. From helping to develop custom solutions to making sure your products arrive on time and complete, we're always at your service!

Bright ideas for home health.

Creating safer environments.

Each year approximately 1.6 million people over the age of 65 are treated for falls. At elio, startling statistics such as these inspire us to provide innovative LED solutions. Solutions that not only address the safety of individuals but also the financial implications of these costly falls. With the estimated annual cost of falls expected to reach \$32.4 billion by 2020, this is an issue we can't afford to ignore.

Influencing the Circadian System.

The Circadian System enables humans to maintain synchronization between night and day. Many factors can effect this vital system, and lighting, either natural or artificial, is one of the most critical. Bright white light or blue light has been shown to disrupt the bodies' sleep cycle while amber lighting has little affect on this cycle. Recent studies have indicated that the disruption of an individuals sleep cycle, will contribute to an increased risk of falling. Amber night lights provide the necessary night time lighting without further contributing to fall risk.

Battery IllumaGrip

Standard IllumaGrip

IllumaGrip® Illuminated Assist Handles

Recognized for new product design innovation by the Healthcare Design Nightingale Awards, IllumaGrip's aesthetics coordinate with the design of any interior. Available in both a battery-powered and direct wire option. IllumaGrip is ADA compliant, exceeds the 250-lb. pull test requirements, is rated for wet applications, and is easy to install and clean. IllumaGrip can be mounted either vertically or horizontally.

The battery version is available with either AA batteries or re-chargeable. A photo sensor triggers illumination, extending battery life. It comes in an 18" length with cool white or amber LEDs, and your choice of white, brushed nickel, chrome, or oil-rubbed bronze end caps.

The standard version can be specified with polished or brushed stainless steel end caps. It is available in multiple lengths with a cool white LED.

Navi Night Light

Navi™ Night Light

Navi is an LED night light with an integrated photo cell/occupancy sensor that automatically illuminates based on ambient light levels and movement. Ensuring you have enough light to navigate to the bathroom without wasting electricity. The light projects downward, creating even illumination without glare. Navi installs in a standard wall box and is easily retrofit into existing electrical outlets. The high/low and timing settings can be customized during installation. The night light is available with either a cool white or amber LED and can be specified with either a brushed stainless or white antimicrobial face plate.
