

Our aim with **elio Light Bites** is to help you to better understand lighting, how it effects office ergonomics, how you can improve existing spaces with simple lighting recommendations, and how you can generate more **high margin** sales.

Footcandle

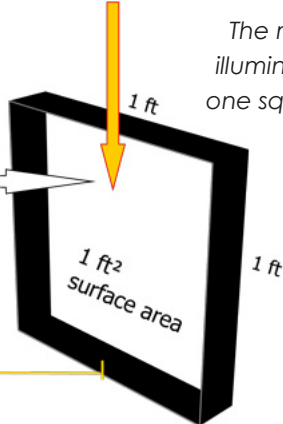

1 Candle \approx 1 Lumen

Distance = 1 ft

1 Footcandle = 1 lumen/ft²

The measurement of illumination falling on a one square foot surface.

In office furniture applications, footcandles are typically measured at 20" per the standard overhead cabinet heights.

Desk Lamps are measured at around 16".
