IMPORTANT SAFETY INSTRUCTIONS. READ CAREFULLY FOR YOUR PROTECTION AND SAVE ALL INSTRUCTIONS.

- *Disconnect power before installing, adding or changing any component.
- *To avoid a hazard to children, account for all parts and destroy all packing materials.

General Care and Cleaning

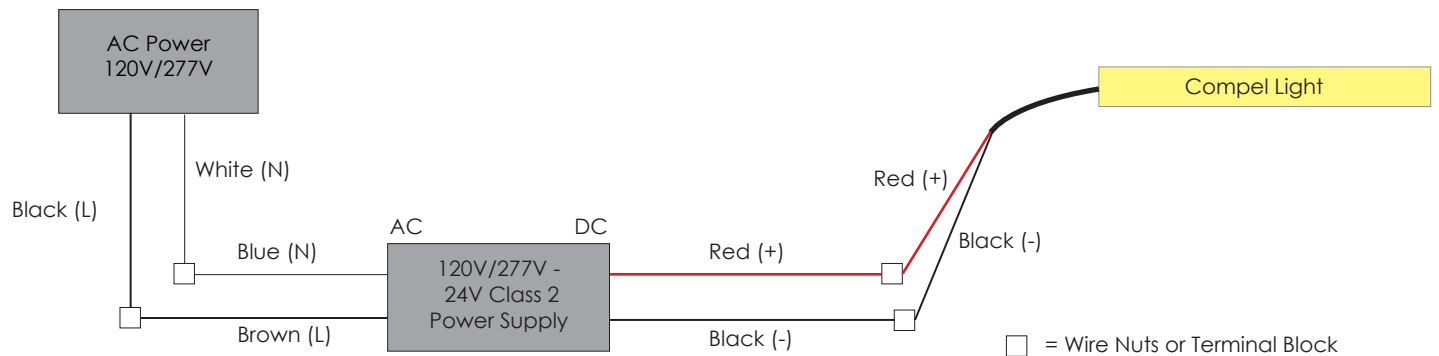

Long life and the exceptional performance of any equipment is dependent upon the care it receives. To ensure a long life, proper sanitation, and minimum maintenance costs, these lights should be thoroughly cleaned, and wiped down weekly, at a minimum. Surfaces may be cleaned with a mild detergent and warm water to protect and maintain their appearance.

- Do not use abrasive cleaners or scouring pads, as these will damage or scratch the light.
- Do not use solvent, oil or acidic-based cleaners on any interior surfaces.
- Do not use steam or high water pressure hoses to wash the lights. These will cause leaks and poor performance or potential failure.

- Determine the installation location for your fixtures. Screw in the fixtures¹.
If using the mounting brackets screw in the brackets and snap the light in place².
Wire the light to the power supply using the wiring diagram below.
Test light to ensure functioning correctly.

- See wiring diagram below for power supply wiring instructions.
