

Our aim with **elio Light Bites** is to help you to better understand lighting, how it effects office ergonomics, how you can improve existing spaces with simple lighting recommendations, and how you can generate more **high margin** sales.

Tips for Reducing Office Glare

Overhead lights placed parallel to the users line of sight.

Place monitors perpendicular to windows

Reduce the number of overhead fixtures or remove half the bulbs to decrease the amount of ambient light

Tilt monitors down slightly to reduce glare from overhead lights

Use personal desk lamps for tasks that require more light
