

LOOK™ Mirror Updates

Mirror Part Number Update

Current Part #: 69455.XXX.LLLL.KK.3P120
New Part #: 69455.XXX.LLLL.KK.RMT

Power Supply Junction Box
Part #: 690010.121

Overview

- Mirrors will now be hard wired instead of plug-in and the power supply will be ordered separately (see part # above).
- The power supply junction box can be ordered ahead of the mirrors, allowing the electrical contractor time to rough in and pull the buildings wiring without having the full mirror assembly.
- Provides more installation flexibility because the power supply can be mounted on the back of the mirror or remotely and still meet building code.
- Power supply junction box can be screwed into the pre-installed brackets on the mirror or into contractor supplied blocking.
- Detailed dimensional drawings are available for all mirrors to help in planning the layout of blocking and power supply location.
- Power supply includes code compliant 1/2" knockouts and WAGO style connectors.

Electrical Specs:

Output: 24V DC
Input: 100 - 277V
Wattage: 96W
Dimming: 0-10V

Applies to all LOOK mirror styles & sizes
